Coffee Cozies Instructions

Items you will need for this project:

Cozie Template

Elastic

Buttons

Fleece

Fabric for the front & back of the Cozie

Embroider the design first.

Print the template at 100%.

Note: In order for the embroidery design to fit on your Cozie, you need to print the template at 100% actual size. Cut out the two pieces and tape the seams together. Measure your template with a ruler to verify the size before cutting your fabric.

1. Using the template and a fabric pencil, lay the template centered over your embroidery design.

2. Trace around the template. This is your cut line.

3. Repeat steps 1-2 on an additional piece of matching fabric, and a piece of fleece. The fleece is the inside of the Cozie.

4. Lay your fabric pieces right side facing each other, with the fleece underneath. Now pin your elastic in place, between the two matching fabrics. When you turn the Cozie right side out, the fleece should be on the inside, and the elastic will be stitched inside.

5. Close your pieces together and pin all the way around, but leave an opening at the bottom for turning the fabric.

6. Stich around all sides, making sure to stitch over the elastic multiple times. This will ensure that it won't come loose. *Remember to leave an opening for turning the fabric!
7. Now turn the fabric right side out and close the opening with pins. Hand stitch the opening close.

8. Pin the Cozie to your coffee cup. Using a marker, place a dot where the button needs to go.

9. Hand Stitch the buttons in place.
10. Button up and your Cozie is Complete!
